Reasons for allowance

1. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach the combination of limitations in the independent claims 1, 10, and 15, especially, "writing the activation records, the identified program statement, and the nullification statement to a resulting code file for the middleware computer program" shown in fig. 3, item 340.

Ungar et al. (US 20010013117) teach determine whether the current reference is the last reference in the set of references to be scanned and garbage collection – paragraph 0016; provide a client with access to class files from a server on a network – par. 0047; either an interpreter or a JIT compiler transforms the byte-codes class files into machine code so that they can be executed by the processor(s) – par. 0051; prior to garbage collection, the references to object B were explicitly released by a method assigning a "null" value to the respective local variables – par. 0062. Ungar et al. do not explicitly disclose the limitations listed above.

Art Unit: 2163

2. Dependent claims 5-6, 9, 19-20, 23, 27-28, and 29 incorporate the listed limitations by reference and contain limitations that further distinguish over the art of record.

For these reasons, claims 5-6, 9, 19-20, 23, 27-28, and 29, are considered allowable over the art of record.
